

Nertype

Nertype language is a constructed (opposing natural) literary language or *conlang* for short. It was inspired by toki pona, lojban and my own experience in using programming languages. My goal was to create a minimalistic yet expressive language without ambiguity.

We can be vague, but not ambiguous.

— Some lojban speaker

Predicates

Predicate	Arity	Definition
scaly	3	x_1 is reptile/amphibian/scaly/crawling creature of species x_2 with a scale x_3
